2. Citations and explanations

This report makes reference to the following document cited in the international search report:

D1: WO 96 06048

Novelty (PCT Article 33(2))

The prior art does not describe the present crystal modification.

Inventive step (PCT Article 33(3))

D1 describes the present compound and can be regarded as the closest prior art.

The present invention addressed the problem of providing a new solid form of the compound in the title.

D1 does not suggest the solid body structure of the compound described therein, nor does it suggest other possible crystal structures or how to produce them.

The present invention therefore involves an inventive step.
